

# 2021 ICASSP PROGRESS WORKSHOP

June 4-5, 2021

[ieeeprogess.org](http://ieeeprogess.org)

Join us in the second year of **PRO**motin**G** Dive**R**sity in Signal Proc**ESS**ing (PROGRESS), which is an initiative of the IEEE Signal Processing Society designed to motivate, provide information and support women and under-represented minorities in pursuing academic careers in Signal Processing.

At PROGRESS we believe that diversity and inclusion are pillars of innovation. The key to increasing diversity and inclusion in signal processing is a more diverse faculty. Such faculty offer role models and are well positioned to draw women and under-represented minorities to the field and inspire them for excellence.

Attend PROGRESS and discover what a career in academia can offer you.

Attendees will be able to ask questions and find valuable resources as they pursue a successful vocation in academia. Why academia? How do you prepare your application materials? How do you prepare for an interview? What does it take to be successful?

**Attendance is by application only.** Graduate students, undergraduate students, or postdocs who are women or under-represented minorities and are interested in signal processing or related fields are eligible to apply.

**Development grants**, which cover the PROGRESS workshop registration, are available.

Applicants should upload the following materials:

- Applicant's CV
- A brief statement (one page limit) by the applicant describing their experience, career plans, and what they expect to get from this workshop (this is optional for general applicants but required for development grant applicants)

Accepted applicants will be given a link to register.

Registration will be free for those who have registered for ICASSP 2021.

**Deadline for Application Submission: June 1, 2021**

**Acceptance Notification: TBD**
